

What about Deep Learning?

• Do I still need to know about image analysis?

• *Yes! But what you need to know may differ*

What parts of image analysis can Deep Learning replace?

• *Classification, segmentation, restoration...*

• Can I trust the results from Artificial Intelligence?

• *Can you trust the results from other algorithms?*

• *Have good controls, verify results!*

What about Deep Learning?

- Do I still need to know about image analysis?
 - *Yes! But what you need to know may differ*
- What parts of image analysis can Deep Learning replace?
 - *Classification, segmentation, restoration, ...*
- Can I trust the results from Artificial Intelligence?
 - *Can you trust the results from other algorithms?*
 - *Have good controls, verify results!*

Processing vs. Analysis

Image Formation
object in → image out

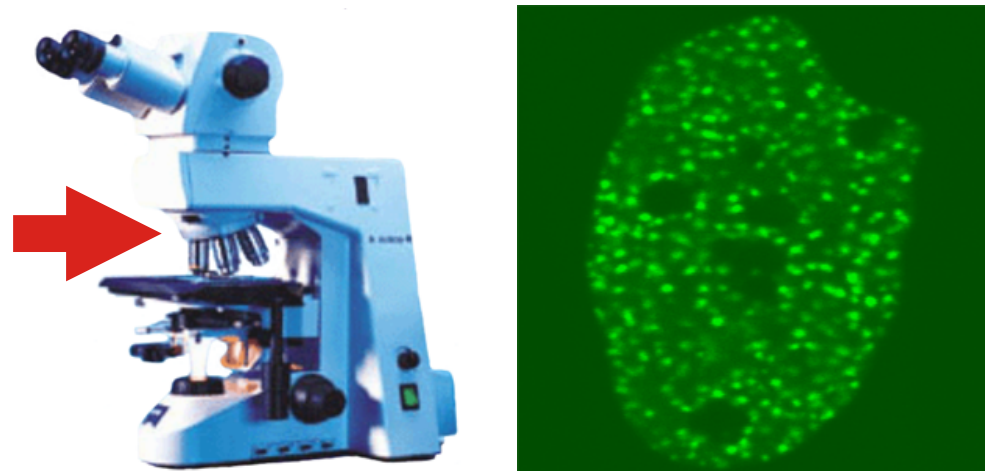

Image Processing
image in → image out

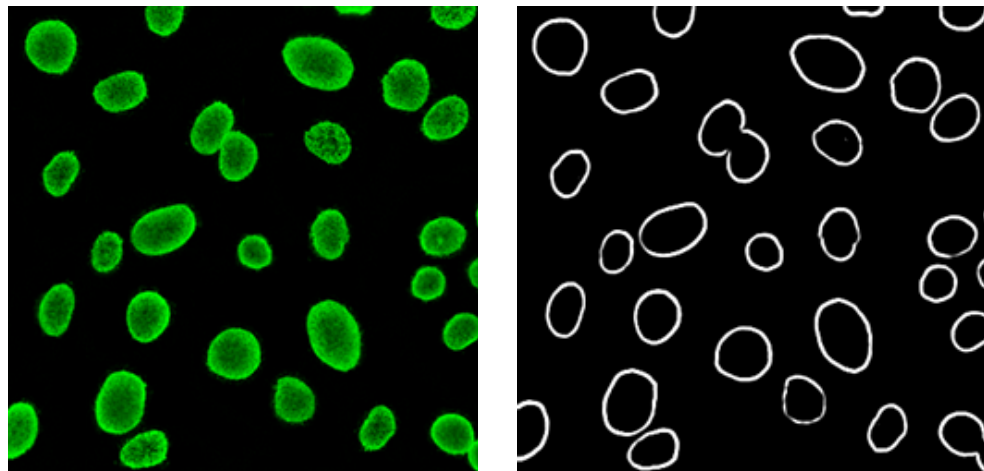

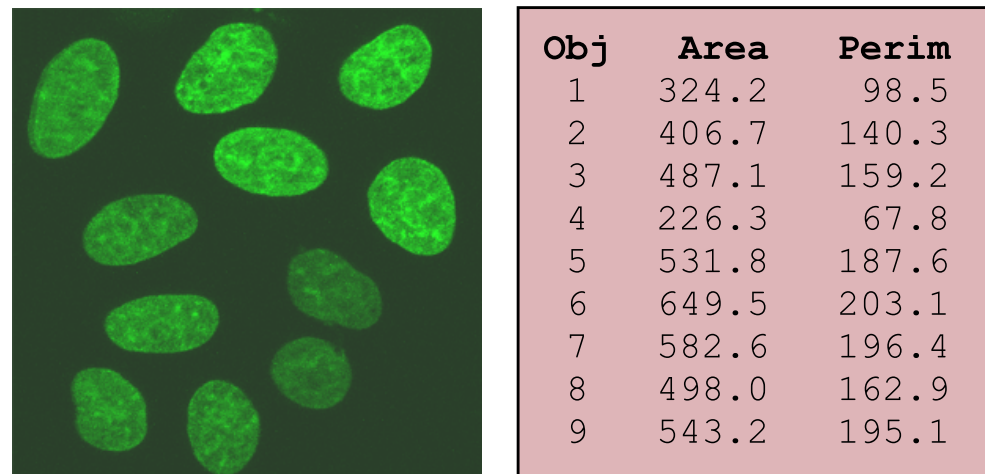

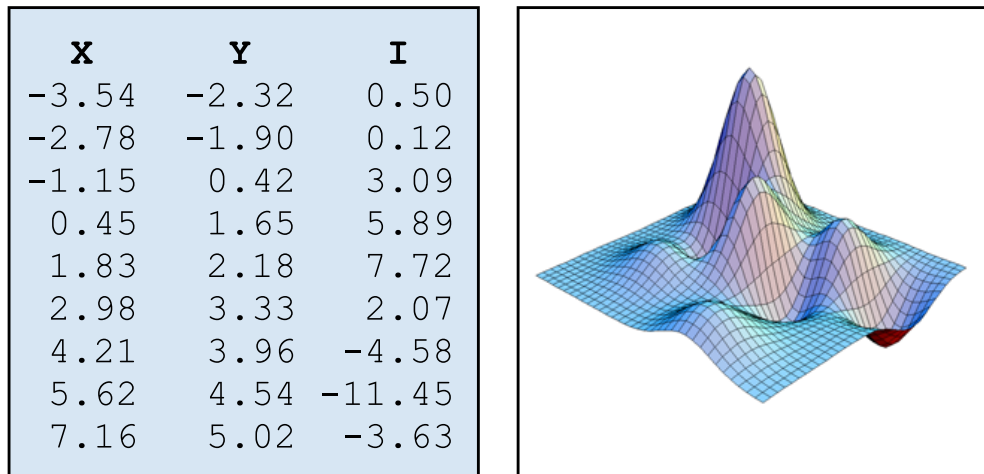

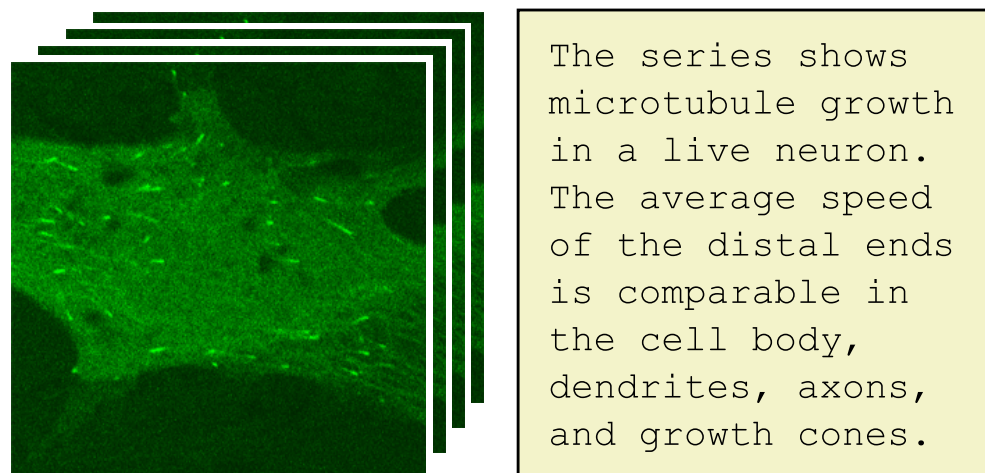

Image Analysis
image in → features out

Computer Graphics
numbers in → image out

Computer Vision
image in → interpretation out

Visualization
image in → representation out
