

Using ChatGPT-4 for Image Analysis

Here is the code that was used for this process:

python

 Copy code

```
# Extract the blue channel, as the nuclei are stained with a blue dye
blue_channel = image[:, :, 0]

# Apply GaussianBlur to the blue channel
blurred_blue = cv2.GaussianBlur(blue_channel, (5, 5), 0)

# Perform Otsu's thresholding on the blue channel
_, blue_thresh = cv2.threshold(blurred_blue, 0, 255, cv2.THRESH_BINARY_

# Find contours on the thresholded blue channel
contours_blue, _ = cv2.findContours(blue_thresh, cv2.RETR_TREE, cv2.CHA

# Draw the contours on the original image to show the segmentation of n
contoured_blue_image = image.copy()
cv2.drawContours(contoured_blue_image, contours_blue, -1, (0, 255, 0),
```
