

Image Analysis Workflow

- There are typically *five* steps in an image analysis
- Often a good idea to structure work along these lines before starting

Think of this even ***before*** you acquire the images!

otherwise image analysis may become only a ***post-mortem*** on your experiment

- **Data-wrangling in general**
 - Image format conversion, incl. lossless compression
 - Renaming
- **Restoration and Reconstruction**
 - Tomographic reconstruction
 - Registration (3D stacks)
 - Stitching (tiled images)
 - Illumination correction
 - Intensity normalisation
 - Deconvolution
 - Filtering (smoothing, sharpening, etc)
 - Grayscale morphological operations
- **Color deconvolution**
- **Channel alignment (chromatic aberrations)**
- ...
